The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/583,745	Applicant(s) KOVACS, LASZLO	
	Examiner DANIEL L. ROBINSON	Art Unit 3742	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 7-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ponting et al.(US2003/0126994) in view of Boyer et al.(U.S.Pat.5,324,917). Ponting discloses an apparatus for deep frying that shows all the structure of the claimed invention but fails to explicitly show a temperature controller whereby the time derivative of temperature is used to control temperature of the heating device. Boyer discloses a device and method for regulation of the temperature and/or power of a cooking apparatus that explicitly shows using the time derivative of the heating element as a means to cut power to the device. It would have been obvious to one of ordinary skill in the art at the time of the claimed invention to use a time derivative of the temperature as a means for control as taught by Boyer with the apparatus of Ponting so as to detect an empty cooking vessel.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Onken, Boggs and Clausse are cited to show structure similar to the claimed invention.
